THE DONG-A ILBO.

SEOUL, KOREA, THURSDAY, AUGUST 7, 1924.

THE KOREAN STUDENTS IN EUROPE.

As for the expenses and the way of living, all depends upon the individual and his tastes. According to my own experience, I needed every month 30 pounds (270 yen) when I was in Oxford, 1914-16; about 1,000 francs (150 yen) in Paris, 1919; 400 francs (200 yen) in Zurich, 1917-18; about 1,600 lire (180 yen) in Florence, 1920. But it was much cheaper in Germany. I needed about 30,000 Marks for a month in the 1922 (Autumn). With this amount I could have two rooms, three good meals every day, and enough not only for stationery and other daily expenses but also for theatres and concerts which I attended generally twice a week. And all these comforts and luxuries could be had with 30,000 Mark, that is, not more than 80 yen! In England the students are living either in college rooms or in boarding houses or as a family as "paying guests." But on the Continent they get rooms and buy their meals in restaurants, and therefore they have less social life there than in England, although some prefer this way of living because it is "freer" compared to the "stiffness" of the English society life. In spite of this stiffness, I found the student's life in England more refined and therefore more agreeable than in any other continental countries.

Finally, I should like to say a few words about the associations of our students in Europe. Of such there are at present one in Germany and one in France. The former is more a club than an association with any definite aim while the latter is more a patriotic association than a students' association. There is at present an opinion among our students in Europe and in America that they sooner or later form an association of all Korean students abroad with a periodical to be published at home for furnishing mutual information and giving every facility to those who go to foreign countries.

(完) 生學朝來米歐
